DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 31-32, 45-48, 50-54, and 56-57 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, does not provide support for the negative limitation "an ionic liquid source that contains no solid portion" as recited in amended claim 31-line 4 and amended claim 32-line 4. Note that negative limitations must have basis in the original disclosure in order to not introduce new matter into the specification.

Allowable Subject Matter

Claims 49 and 55 are allowed.

Response to Arguments

Applicant's arguments filed 4/05/07 have been fully considered but they are not persuasive. Applicant argues that the rejection of claims 31-32, 45-48, 50-54, and 56-57 under 35 USC 112, first paragraph, is improper and that the examiner is giving a

Art Unit: 1763

hyper-technical reading to the specification. However, the examiner respectfully disagrees and maintains that the negative limitation of "an ionic liquid source that contains no solid portion" introduces new matter to the claim since the specification fails to provide support for such a term, since negative limitations must have basis in the original disclosure. Furthermore, applicant also argues that describing something as a liquid means that it does not contain solids, and that since the specification states the intent to vaporize molecules from the liquid source, it would be understood that the liquid source does not, to the extent practicable, contain any solids. However, the examiner submits that solids may be contained in the liquid source since the phrase "to the extent practicable" would lead one to believe that it is possible that solids can be part of the liquid source. Furthermore, one of ordinary skill in the art would understand that, for example, there could be undissolved solid material in a liquid source and still be a liquid.

Concerning applicant's argument that the allowability of dependent claims 45-48, 50, and 57 has not been commented upon, note that when the independent claim is rejected under 35 USC 112, first paragraph, normally all claims depending from the independent claim will also be rejected unless the dependent claim corrects the new matter issue. This particular rejection is not the same as rejections under 35 USC 112, second paragraph, which many times are easily corrected and therefore the examiner indicates that correction of the claim will result in allowance of the claim. Claims that are rejected under 35 USC 112, first paragraph, are normally corrected by cancelling the subject matter which is not supported in the original specification.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
